

Wonderful Weather

English

We will practise saying sentences aloud before writing them, use phonics to spell words, and develop capital letters, full stops, finger spaces and clear letter formation.

Maths

We will count, read and represent numbers to 20, explore tens and ones, practise number bonds to 10 and addition and subtraction within 10, and compare length, height, mass and capacity.

Geography

We will observe and record daily weather, identify the four seasons and compare the changeable weather in the UK with the climate in Kenya.

Science

We will explore our senses, compare and group animals by their features and diets, and use observation to investigate living things and our surroundings.

Art

We will experiment with different printing tools and materials, then arrange shapes and colours to make repeating patterns.

Design & Technology

We will explore healthy food choices, design a fruit kebab and practise preparing and evaluating our finished food.

RE

We will find out why Christmas matters to Christians, retell the Nativity story and explore how Christians celebrate the birth of Jesus.

PSHE

We will learn how to show respect, celebrate similarities and differences, recognise bullying, ask trusted adults for help and understand why rules keep us safe.

Computing

We will use digital drawing tools to create patterns and self-portraits, edit colours, save our artwork and talk about what we have made.

Music

We will explore pulse, speed, volume and pitch, create weather-inspired soundscapes and rehearse songs for a Nativity performance.

PE

We will practise key gymnastics shapes, balances and jumps, learn to land safely and link movements together into simple sequences using mats and apparatus.

Forest School

We will work together on outdoor challenges, follow safety instructions, begin to assess risks, recognise familiar plants and animals, and learn about fire-circle safety.
