

Our Local Area

 English

We will develop our speaking and listening skills through stories and discussion. We will practise saying sentences aloud before writing them, using our phonics to spell words and beginning to use capital letters, finger spaces and full stops.

 Maths

We will learn to count, recognise and represent numbers to 10. We will find one more and one less, explore addition and subtraction within 10, and recognise, name and sort 2D shapes.

 Science

We will learn about our bodies and explore our five senses. We will use sight, hearing, touch, taste and smell to investigate the world around us.

 Art

We will explore different lines and marks, develop our observational drawing skills and create self-portraits. We will experiment with collage materials and textures to create our own artwork.

 RE

We will explore what Christians believe about God and why God is important to them. We will listen to stories, ask questions and share our own ideas about the world.

 PSHE

We will explore our feelings, families and friendships. We will learn about what makes us special, how to recognise different emotions and how to build positive relationships with others.

 Computing

We will learn how to use computers safely, including developing our mouse and keyboard skills. We will explore how technology helps us in school and everyday life.

 Music

We will explore pulse and beat through singing, movement and musical games. We will practise listening, copying rhythms and singing together using call-and-response songs.

 PE

We will explore different ways of moving our bodies, responding to music and expressing ideas through dance. We will practise moving with control, linking movements and performing simple sequences.

 Geography

We will explore our local area of Ramsgate, identifying familiar places and landmarks. We will use aerial photographs, create simple maps and learn how symbols and keys help us find our way.

**Forest School**

We will work together on outdoor challenges, follow safety instructions, begin to assess risks, recognise familiar plants and animals, and learn about fire-circle safety.
